The microsite is complete in the tone and style. And the following are some notes to improve.

- Keep working on the interior pages that follow the category in the menu bar.
- Think about the text and image relationship. How would this transfer the feeling of the photographer's own personal style and the feeling of memory.
- Try a simpler way of previewing the previous and the next image in the gallery page on the left and right sides instead of aligning them at the bottom.
- Adjust the font size properly of the menu bar, giving more spacing on the two sides.
- Build a footer, can be very simple. It shouldn't distract the viewers from the images presented.
